Exploratory testing report

Session ID	1		
Author	Piotr Tarach	**Date**	22.04.2023
Session start	11:00	**Session end**	12:25
No.	**Tested elements**	**Defect**	**Suggestions**
1	attempt to register a user with all fields blank		The message Field [user name] is required - -. insert "" instead of brackets
2	attempted user registration with all fields completed and terms and conditions accepted	The message 'unexpected error' is displayed, followed by 'error in email address field' - the email already exists in the database.	When checking the e-mail, the user receives a registration confirmation - which means that the registration was successful, but gives an erroneous feedback message. **This is a major bug**
3	attempt to register a user with all the fields completed and the accept terms and conditions box unchecked		
4	Attempt to register a user with only a username filled in		The message Field [email address] is required - -. instead of brackets insert ""
5	attempt to register a user with a complete e-mail address only		
6	attempt to register a user with only an e-mail address and a username filled in		The message Field [password] is required - -. insert "" instead of brackets
7	attempt to register a user with only the password field completed and repeat password		
8	attempt to register a user with only the password field completed		
9	attempt to register a user with only the repeat password field completed		
11	Attempting to register a user with only the username completed and the accept terms and conditions box checked		
12	attempt to register a user with only an e-mail address and a tick in the accept terms and conditions box		
13	attempt to register a user with only the password and repeat password fields completed and the accept terms and		

	conditions box checked		
14	attempt to register a user with only the password field completed and the accept terms and conditions box checked		
15	attempt to register a user with only the repeat password field completed and the accept terms and conditions field checked		
16	Attempting to access the link to the terms and conditions		
17	Checking that the terms and conditions are displayed correctly		
18	Attempting to register with a login consisting of 1 character and the other fields correctly filled in and the accept terms and conditions box checked	The message from No.2 is displayed and the user is registered in the database	See no.2; Correct the message and perform an assertion of the length of the user name that meets the security requirements.
19	Attempting to register with a login consisting of 8 characters, with the other fields correctly completed and the accept terms and conditions box checked	The message from No.2 is displayed	See no.2
20	Attempting to register with a login consisting of 9 characters, with the other fields correctly completed and the accept terms and conditions box checked	The message from No.2 is displayed	See no.2; Correct the message and perform an assertion of the length of the user name that meets the security requirements.
21	Próba rejestracji loginem składającym się z 60 znaków i poprawnie uzupełnionych innych polach i zaznaczonym polem akceptuj regulamin	The message from No.2 is displayed	See no.2; Correct the message and perform an assertion of the length of the user name that meets the security requirements.
22	Próba rejestracji loginem składającym się z 6 znaków, ale 1 białym znakiem i poprawnie uzupełnionych innych polach i zaznaczonym polem akceptuj regulamin	The message from No.2 is displayed	See no.2, 19; Correct the message and assert the character content of the user name in compliance with security requirements.
23	Próba rejestracji loginem składającym się z 6 znaków, ale 2 białymi znakami i poprawnie uzupełnionych innych polach i zaznaczonym polem akceptuj regulamin	The message from No.2 is displayed	See no.2, 22

General comments on the report

- Don't go into great detail too much,

- It is better to combine similar TCs into one group (blank fields, full fields, invalid

  fields)
